# INFINITE LIPSTICK

(REF. L.N.T.)

## LIPSTICK STICK LONG LASTING

A creamy, long-lasting lipstick where the high chromaticity of the finish meets the strength of the latest generation of ingredients. Thanks to the thin and homogeneous film that forms from the first stroke, the product adheres perfectly to the lips, dressing them in color.

The texture is creamy, soft and ultra-solid. Spreading is easy and comfortable. In application, color release is immediate and easily adjustable. The semi-matte finish gives an intense, full-bodied effect. Lips have never been more in focus!

## CONTAINS

- Emollient oil that makes the texture creamy and melting;
- High concentration of sublimating pigments for high coverage;
- Lightweight, volatile oils that lock product in place on lips;
- Structuring waxes give the product body;
- Silicone resin that forms a thin, long-lasting film on lips.

## APPLICATION TIPS

Outline lips with a transparent pencil, apply lipstick from the center of the lipstick to the corners of the mouth. For a more controlled and precise application, use a lip brush.

## PACKAGING SUGGESTION

We recommend placing the product in an airtight pack to maintain the properties of the formula.
