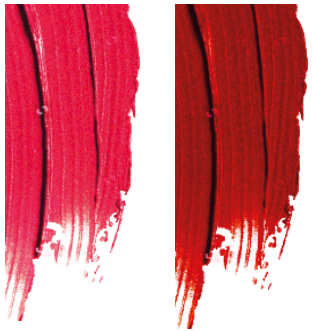
KISSPROOF LIPSTICK

(REF. H.Y.P.)



LIQUID LIPSTICK "MATTE" FOR LONG LASTING

An intense veil, soft and impalpable at the same time, to give a pure and decisive colour to the lips, defining their contours to perfection. The formula is the synthesis of refined scientific research, aimed at ensuring a pleasant application of the product, smooth and intense right from the very first application and a perfect adhesion to the lips, which will appear immediately uniform and smooth. After a few second of drying, the product is perfectly matt and maintains its pleasant plasticity characteristics, maintaining the color and the uniformity as promises. Kissproof Lipstick has been enriched by Hyaluronic Acid, known for its ability to retain water on the surface of the membrane, and therefore able to give a feeling of natural and physiological well-being.
Its durability is impeccable: even hours after application.
The ideal accomplice for an always excellent look

CONTAINS

- Lightweight oils easily absorbed by the labial mucosa to give comfort and softness over time.
- Volatile oils for an impeccable fixing of the colour on the lips and a long hold and matte effect
- Cross-linked resin ideal for covering the lips with an elastic and comfortable film, known for the perfect no-transfer effect of the colour on the lips.
- Microporous powders of natural origin, which work in synergy with volatile oils, to strengthen the matte finisher effect
- Hyaluronic Acid: polysaccharide from bio-technology, able to retain water in the superficial layers of the mucosa, and able to rebalance the effect of pigments and volatile oils on the lips, giving comfort.

APPLICATION TIPS

Precisely outline the lip contour with the tip of the applicator or the thinnest side and proceed with filling the lips until a full and even result is achieved. Allow to dry for a few seconds.

PACKAGING SUGGESTION

Flacon with soft applicator, for modulating the cover and finish, or the version with effect tank, for an immediate release of pure and intense colour.
