SMOOTHING FLUID CONCEALER

(REF. N.C.R.L.)

SMOOTHING ILLUMINATING CONCEALER

Smoothing, natural, fluid concealer to use every day for flawless make up. This new formula minimizes imperfections and dark circles, ensuring a medium-high coverage but high blendability. The result is a natural no-makeup look. The formula blends seamlessly into the skin for a natural, luminous finish.

The hyper-pigmented texture and formula enriched with sublimating pigments and water-resistant components make this concealer suitable for even the most extreme conditions. Enriched with a special agent that stimulates the formation of channels that draw water from outside the skin, keeping it hydrated all day long. This concealer covers, enhances and evens out the complexion ensuring a professional result.

CONTAINS

- High concentration of sublimating pigments that provide high coverage but without weighing down the look;
- Thin, impalpable and nurturing texturizing powders with different grain sizes that give a velvety and fine texture;
- Film former that guarantees resistance to water and sweat;
- Cross-linked filmogen that gives long lastingness ;
- Light volatile oils that make the product blendable and long-lasting;
- Stimulating agent for the formation of aquaporins, which are the natural channels involved in the reabsorption of water through the surface layer of the skin.

APPLICATION TIPS

After cleansing the skin and applying a face primer, it is recommended to apply the product precisely by tapping with the tip of the flock to cover imperfections, then blend by rotating the flock or using your fingers or a sponge for a more natural result. In addition to covering imperfections this product is also great for smoothing out small wrinkles or signs of fatigue.

PACKAGING SUGGESTION

It is recommended to place the product inside a seal pack having the following tested materials:
CAP: ABS, Bottle: PETG, Wiper: HDPE.

SHELF LIFE 36 MONTHS

The effectiveness of the functional principles proposed in the paragraph: contains, may be supported by targeted tests if requested by cutomers
