METALLIC EYES

(REF. E.S.M.)

METALLIC EYESHADOW

Eyeshadow with a metallic finish, ideal for those in search of an innovative formula. Creamy and highly pigmented, to obtain a magnetic and extraordinarily luminous look.
The texture is creamy and ultra-comfortable on the eyelids, it does not create lumps and deposits throughout the day.

Its application is easy and blendable, expressing its brilliance from the very first stroke. The release of color is exceptional, the writing is extreme and the multidimensional effect is super intense. Instant shine and dizzying 3D reflections!

CONTAINS

- Blend of spherical powders for an exceptional chromatic effect that combines luminosity and long wear;
- High concentration of pearls with a multidimensional effect, for a color with "alive" and pure volumes;
- Emollient oil that makes the texture creamy and velvety;
- Viscous ester, solubilizing and silky on the skin.

APPLICATION TIPS

For maximum color release, we recommend taking the product directly with the fingertip and blending it with a special pad or synthetic hair brush. For an even more intense effect, apply a shimmer primer before applying the eyeshadow.

PACKAGING SUGGESTION

Traditional cases with one or more seats, in plastic or cardboard. The must of the moment is to create palettes with several harmonies of different colors and textures.

SHELF LIFE 36 MONTHS

The effectiveness of the functional principles proposed in the paragraph: contains, may be supported by targeted tests if requested by cutomers
